RE: Equipment Safety

The London Fire Marshall will again be making a preliminary inspection of the show prior to opening. They will be looking for those exhibitors that have not adhered to the Safety and Protection rules as noted in the Western Fair Rules & Regulations #43 & 44.

Please ensure your staff prepares any vehicles/equipment in the following manner:

“Vehicles containing gasoline will be required to limit the storage of gasoline in each vehicle to one gallon (4.54 litres). Precautions must be taken to render the vehicle inoperable. All batteries must be disconnected and gas and propane caps sealed.”

In the event you receive a warning, the Fire Marshall will return for another inspection.
